PROFESSIONAL SUMMARY

Passionate about AI automation, intelligent workflows, and building practical solutions using Python and modern AI technologies. Continuously learning and exploring modern technologies, with a focus on writing efficient code and improving development practices.

PROFESSIONAL EXPERIENCE

ADRDE, DRDO | Ministry of Defence | Jan 2026 - July 2026

- Developed real-time video processing pipelines using Python and OpenCV for surveillance systems
- Processed RTSP/IP camera feeds to extract frames and perform visual analysis
- Implemented coordinate tracking and object positioning techniques for monitoring applications
- Worked on image-based data processing, enhancing understanding of computer vision concepts

Hex Software | Software Development Intern | Oct 2024-Nov 2024

- Worked on Python-based application development and problem-solving tasks
- Assisted in developing and testing software modules for real-world use cases
- Gained hands-on experience in debugging, code optimization, and version control (Git)

PROJECTS

AI-Powered Blockchain Trend Analyzer using Python

- Built an AI-powered system to analyze trending crypto content using Python.
- Implemented AI logic to identify viral patterns and generate content ideas.
- Used prompt engineering, OpenAI APIs, and Python for automation and analysis.
- Applied AI techniques for trend analysis, content generation, and workflow automation.

AI Content Research Assistant

- Developed a Python-based AI assistant for content research and idea generation.
- Integrated LLM APIs to summarize topics and generate content suggestions.
- Automated information gathering and organization to improve research efficiency.
- Utilized API integration and prompt engineering concepts for workflow automation

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering (Cybersecurity)

- LamrinTechSkillsUniversity, Ropar, Punjab | 2023–2027

SKILLS

- **Programming:** Python, API Integration, Automation Logic
- **AI/ML:** LLM Fundamentals, Prompt Engineering, AI Automation
- **Libraries:** OpenCV, NumPy, Pandas, LangChain, Scikit-learn
- **Tools:** Git, GitHub, VS Code, Postman
- **Concepts:** Workflow Automation, AI Agents, Problem Solving
- **Systems:** Linux, APIs, Automation Basics

EXTRA-CURRICULAR ACTIVITIES

- NSS Member (2021 to Present).
- Participated in IBM Competition.
- Participated in SIH Hackathon.
